

Dr. R.K. Scott

## ROWING CLUB

Captain: Christopher Cardew  
Secretary/Treasurer: Timothy Smith

A keen team was built up last summer term, but the varnish dulled with the oncoming winter. There were several 5.30 a.m. starts during the fortnight preceding Part I exams.

Negotiations with a very much 'head-in-the-clouds' University Rowing Club Executive led to a very beneficial deal, as we exchanged our oldest Clinker cox-four for a good fine-shell. The second Clinker boat was reconditioned by the Universities boatman.

Sutton Bonington triumphed over the O.K.A. team on the winter sports day - the opposition broke down in convulsions of hysterical laughter after a very competitive start, enabling us to cross the line some 90 seconds ahead.

Team was:-

1. C. Cardew
2. T. Ruddle
3. M. Chapman
4. B. Edmunds

Coxwain: Sarah Fretin

The club may be in difficulties this following year due to no interest by the first year.

Special thanks to Coxwain Sarah for trying very hard to cut an oncoming cabin cruiser in half and also to Tim Ruddle for succeeding in fending the cruiser off with his head!

Christopher Cardew

## BUTTERWORTHS Books on Agricultural Science

### QUALITY OF HORTICULTURAL PRODUCTS

V. D. Arthey, MSc, PhD

238 pages Illustrated 0 408 70645 7 £5.75

Presents the characteristics by which the quality of a horticultural product can be assessed and discovers how these apply to the many markets to which the crops are sent. Discusses measurement and world grading.

### COMPARATIVE EXPERIMENTS WITH FIELD CROPS

G. V. Dyke MA, FRSA

222 pages Illustrated 0 408 70554 X £5.75

An easy to read text describing how to plan and carry out field experiments and how to interpret the results obtained. Part of the book is devoted to the relevant sections of statistics necessary for this work.

### POLLUTION AND THE USE OF CHEMICALS IN AGRICULTURE

D. E. G. Irvine Senior Lecturer, Dept of Biology & Geology, Polytechnic of North London. B. Knights, Lecturer, Dept of Life Sciences, Polytechnic No Central London.

160 pages Illustrated 0 407 70544 2 £4.15

Presents a balanced up-to-date discussion of this vital aspect of the chemical pollution problem.

### TRANSPORT OF NUTRIENTS IN PLANTS

A. J. Peel, Botany Dept, The University, Hull.

266 pages Illustrated 0 408 70558 2 £5.05

An up-to-date account of developments in the field of long distance transport physiology providing a balanced view of controversial issues.

### TRACE ELEMENT METABOLISM IN ANIMALS 2

Second international Symposium on Trace Element Metabolism in Animals (Madison, Wisconsin June 1973) Sponsored Jointly by The Steenbock Symposium Fund, Dept of Biochemistry, University of Wisconsin and the U.S. Dept of Agriculture.

W. G. Hoekstra, PhD and J. W. Suttie, PhD. H. E. Ganther, PhD. Walter Mertz, MD

750 pages Illustrated 0 408 70647 3 £17.45

Emphasis is given to basic studies on laboratory animals, practical problems in farm animals, and the medical aspects of trace elements in humans.

### BEEF PRODUCTION FROM GRASSLAND

J. M. Wilkinson, BSc, PhD, and J. C. Taylor, MA, Dip Agric, PhD

118 pages Illustrated 0 408 70442 X £3.65

Considers in depth the basic principles and recent developments in efficient beef production.

Prof. Ivins

## ATHLETICS

Captains : J. Outhwaite, P. Oldale.

This year's intake of first years excelled as never before at S.B! Under enthusiastic leadership they were spurred on to an overwhelming victory on sports day, during which several new records were set, notably by the first year women's team which reduced by 4.7 seconds the record for the 4 x 110 yards relay to 57.3 seconds. Janet Hulbert increased the shot-put record to 24'  $\frac{1}{2}$ ", Jackie Green broke the women's 880 yards by only 34 seconds, bringing the time down to 3 minutes 3.5 seconds. Stuart Marsden took the men's 100 yds trophy (when are we going metric?) and Jackie Green the women's trophy. The first year won the Robinson trophy for the highest year score.

Stuart also showed his talents ex. officio and came a convincing first in the 200 m of the County championships, representing Lincolnshire. Montreal here we come!

Talking of Montreal, I am pleased to say that Terry Leach has been selected for this year's Olympic squad on his velocipede. Well done and good luck. Finally, I would like to express my thanks to all those who took part and helped in athletics.

## AWARDS AND TROPHIES

Victor Ludorum	G. Anderson
Vitrix Ludorum	J. Green
Robinson Trophy	First Year
Mile (men)	D. Maiden
Cross Country (men)	D. Maiden
Road Race (men)	D. Maiden
100 yards (men)	S. Marsden
100 yards (women)	S. Wilson
Relay (men)	First Year
Yard of ale (men)	W. Longthorpe

P. Oldale.

## BADMINTON CLUB

Chairman : Geoff Pearson  
Treasurer : Rob Hale  
Secretary : Caroline Summerlin  
Second Year Rep : Janet Hulbert  
First Year Rep : Ian Waterman

From the beginning of this academic year there seemed to be a revival of interest in this club.

Initially we hired Kegworth Village Hall which was too small to accommodate all those interested in playing the game. This resulted in a drastic drop in numbers attending; and this resulted in the club running into financial difficulties. We have now acquired the use of Loughborough Sports Centre on each Friday night and renewed interest is being shown by many people here at S.B.

Hopefully next season we will enter a local league and competitive badminton can be introduced.

(Anyone wishing to play or learn to play the game, please see Geoff Pearson H5 Rm 21).

G.P.

## BOAT CLUB

Captain : Julian Cardew  
Secretary and Treasurer : Tim Smith  
Canoeing : Tony Suckling

The past summer was probably one of the best in terms of the numbers participating. The canoeing department of the club took a paddle forward with the purchase of two new canoes at the beginning of the summer term, bringing the total to four. However, interest shown by the first year suggests that we might once again find ourselves short of boats by the summer.

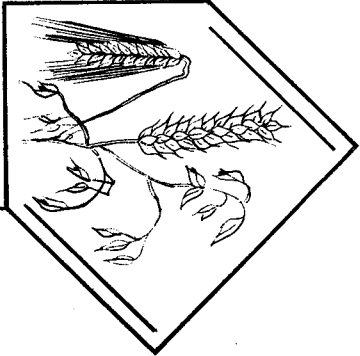

The rowing side of the club also has had good support, although judging by the state of the hulls and bows, a great deal of rowing is carried out along the bank. The fine shell we obtained from main campus has proved very useful, both in providing a better boat for the more experienced, and also in providing a lot of laughs for the people watching. We were looking forward to an even better summer next year - good luck to next year's officials.

Tony Suckling

Achievement of the year goes to the sailing club, who claim to have shown that archimedes principle works at least 80 per cent of the time!
